

Joey Stansfield

Software Developer

✉ joseph.r.stansfield@gmail.com ☎ 937-287-0228 🌐 jstans12

Once a distiller, now a developer, I like writing clean, scalable code and solving complex problems. I have four years of startup experience and am capable of learning new things and taking leadership roles when the job calls for it. When I'm not working, you'll find me rock climbing and fly-fishing in the mountains.

» SKILLS

Ruby, Rails, Javascript, jQuery, Node.js, SQL, REST, JSON, Git, HTML, CSS, Google Chrome Extensions

» PROJECTS

Spackle

Spackle is a google chrome extension that acts as a comment feed for each unique URL. A rails api serves JSON to the extension. The reddit inspired nesting and upvoting system ensure that you see the most relevant information first.

Open Distillery

An open source toolbox for distillers. This application sees active use. It was my first foray into coding and reason why I chose to pursue software development.

» EDUCATION

Turing School of Software and Design

Back-End Engineering

Ohio University

BS Geography 2012

» EMPLOYMENT

Golden Moon Distillery

Golden, CO

Distiller · Nov 2014 to Aug 2016

- Business Consulting - upon initial hire reconstructed 12 months of production and financial data to address a federal and state tax backlog, and developed a system to address tax compliance in real time.
- Records Management - Created a system in Excel for accurate and efficient tracking and reporting of both products and financial metrics.
- Operations Management - Troubleshoot and maintain specialty equipment
- Distill, proof and bottle of 14 unique products.

Breuckelen Distilling

Brooklyn, NY

Distiller · Jan 2013 to Aug 2014

- Managed every step of the distilling process from grain to barrel to glass.
